Formulary

EpiphanyRx Formulary

Welcome to EpiphanyRx! We are excited to serve you and manage your prescription drug benefits. This drug list, or formulary, contains important information about drug coverage. Our team of pharmacists, nurses, doctors, statisticians and healthcare economists review drugs approved by the U.S. Food and Drug Administration (FDA) to determine coverage for you and your employer. This drug list is regularly updated and subject to change at any time.

About the list

You can use this list to find information about drug coverage and therapeutic options. You can search for a drug name by downloading the document and clicking on **Edit** and then selecting **Find/Search** or by using the **Control** and **F keys** on your keyboard. After typing in the drug name, click **Search** to find your drug. It is always an option to bring this list with you to your next doctor's appointment. You can use the information from this list to talk with your doctor about potential lower-cost drug options.

On the list, each drug is identified with a tier value based on the drug's cost to the plan. Tier 1 drugs are the lowest cost drugs to the plan and Tier 3 are the highest cost drugs to the plan. Your plan may cover specialty drugs in Tier 4. Tiers are important because the amount you pay is based on the drug tier. You can receive up to a 30-day supply of most medications on the formulary. Some drugs, like diabetes and drugs to help with heart conditions, may be covered for up to a 90-day supply. If you are interested in which drugs may qualify, please reference the Maintenance Drug list located at <https://epiphanyrx.com/resources/members/>.

While this drug list is a good guide, it is good idea to check your Summary Plan Description to confirm the amount you will pay and what coverage your plan allows.

Some FDA-approved drugs may not be covered by the plan if they have over-the-counter (OTC) equivalents or provide low-value as compared to other drugs available on the plan's formulary. Not all FDA-approved indications or uses may be covered for a drug if multiple uses exist. Your prescription drug benefit plan may not cover certain products or drug categories regardless of the appearance in this document. Your Summary Plan Document is a good place to go to better understand exclusions. You can always call us if you have questions, by dialing 844-820-3260.

Under the Affordable Care Act, certain preventative medications may be covered at a \$0 copay. Please refer to the Affordable Care Act Preventative drug list located at <https://epiphanyrx.com/resources/members/> for these drugs.

Legend

Prior Authorization (PA) – The Plan requires a review to determine if the drug qualifies for coverage under the benefit. If your physician prescribes a drug that requires a prior authorization, the PBM will work with your prescriber to complete the prior authorization review. Either you or the pharmacy can ask your doctor to call 844-820-3260 to initiate the prior authorization or appeal process.

Quantity Limits (QL) - For certain drugs, the amount of the drug that will be covered by the plan is limited based on national standards and current scientific literature. These limits ensure the quantity of units supplied for each prescription remain consistent with clinical dosing guidelines and benefit plan design.

Tier (T#) – The value that determines the copayment in which you pay for the medication. Every drug will be given a tier value. Refer to your Summary Plan Design document for the specific copayment.

Specialty Drugs – Specialty medications are drugs that are used to treat complex conditions, such as cancer, growth hormone deficiency, hemophilia, hepatitis C, immune deficiency, multiple sclerosis and rheumatoid arthritis. Specialty drugs must be obtained from a select pharmacy and are limited to 30-day supply.

Non-Essential Health Benefit Drugs - Your plan may cover select Non-Essential Health Benefits (Non-EHB) Drugs at the tiers outlined below. Any amount you pay for Non-Essential Health Benefits Drugs will NOT count toward your deductible and/or out of pocket maximum.

Drug Name	Route	Tier	Specialty	PA	QL	Non-EHB
